The rationale for this treatment schedule is based on two major premises: (a) the anti-inflammatory or therapeutic effect of corticoids persists longer than their physical presence and metabolic effects and (b) administration of the corticosteroid every other morning allows for reestablishment of more nearly normal hypothalamic-pituitary-adrenal (HPA) activity on the off-steroid day.

If you have forgotten to apply your dose then use it as soon as you get remembered.

This may be prevented by having evening rituals such as washing the dishes, watching TV or walking about for a while to make the patient serene and sleep tight.
